AGENDA

1. Quorum Present
2. Confirmation of Minutes of SPC Meeting held on 14th June 2021
3. Matters Arising
4. Progress Report from Director of Services
5. Draft Policy for Naming of Infrastructure
6. Local Improvement Schemes
7. Environment – Draft Litter Management Plan 2022-2024
8. Correspondence
9. Date of next meeting

Abstract
The present study was designed to investigate the effect of temperature on the rate of reaction between hydrogen peroxide and potassium iodide in the presence of a catalyst. The reaction was carried out at various temperatures and the rate of reaction was determined by measuring the volume of iodine produced over a fixed period of time. The results show that the rate of reaction increases with increasing temperature, and the activation energy of the reaction was calculated to be 50 kJ mol⁻¹.
