Subject: RE: 400kV/110kV Substation Development at Coolinabacky
Attachments: Environmental Response to LCC 19042022.pdf

Rory/Ann Marie

Apologies for taking so long organising this as I was waiting on various people to respond.
Monday 23rd May in the afternoon 2.30pm suits the various people involved.

I wont be there myself but I expect the following to be there:

- Jer Keohane – IE Consulting (Hydro Consultant)
- Donal O'Shea – ESB Site Engineer
- Willie O'Dwyer – ESB PM
- Rose Walsh – ESB Environmental

We submitted the proposed ground and surfacewater monitoring in the letter to LCC dated 19th April 2022 (copy attached) and a report on the tufa springs completed by IE consulting. This contains recommendations including a relocated outfall for a surface water discharge pipe location having regard to the tufa springs.

I presume you will discuss/agree the above issues on site during your meeting.

If you need to you can contact Donal O'Shea (ccd in email and 087 1668889) in advance of the site visit closer to the time.

Brendan

Can you please arrange an on-site meeting with Laois County Council's Environmental Protection Team for one of the following dates:

23rd May; 25th May; 30th May; 31st May or on the 26th May in the morning?

Thanking You

Rory O'Callaghan
Senior Executive Engineer
Laois County Council
Waste Management & Environmental Protection

Email: rocallaghan@laoiscoco.ie

Prevention			
	Wash	your hands well and often to avoid contamination	
	Cover	your mouth and nose with a tissue or sleeve when coughing or sneezing and discard used tissue	
	Avoid	touching eyes, nose, or mouth with unwashed hands	
	Clean	and disinfect frequently touched objects and surfaces

Simon

Thanks for the response.

Item 1 – we will arrange a meeting with Msrs O'Callaghan and Callan.

Item 2 – we will technically review the issue raised and revert.

Roads issues – we are finalising these at the moment and will issue a drawing for discussion with yourself and Philip.

Subject: FW: 400kV/110kV Substation Development at Coolnabacky

Dear Brendan,

Further to your correspondence dated 19th April 2022, I confirm that the contents are noted and the correspondence will be uploaded to our files. Thank you for your detailed response.

Two matters arise for further action/clarification;

1. The need to establish a meetings schedule with Msrs O'Callaghan and Callan. We are keen that a start up meeting be convened prior to the end of May 2022 with a view to finalising the details of the Ground and Surface Water Monitoring Programme(s) and to review monitoring results provided to date. I note your commitment to this in recent correspondence and request that contact be made with a view to agreeing the details of the Monitoring Programme before the end of June 2022.
2. I note that 'ESB can confirm that it is not intended to roof the transformers.' I further note the comment that 'there may appear to be differences between Drawings PE610-D002-003-012-001 and PE610-D002-003-004-001.' From my viewing there are differences between the drawings. One drawing (PE610-D002-003-004-001) does not indicate a roof on the transformers/shunt reactors whereas the other (PE610-D002-003-012-001) does show a roof between Grid Lines 4 and 5 on the two

sections provided. Mitigation measures, set out in Section 10.5.1.2, state that 'Oil storage and the transformers will be stored in designated areas with an impervious base. These areas will be bunded to a volume of 110% of the largest tank container within the bunded area(s) (plus an allowance of 30mm for rainwater ingress).....' I seek clarity as to whether the stated mitigation measure is for the roof or the no roof scenario and, separately, whether the no roof scenario requires mitigation measures over and above those already provided, all in the interest of ensuring adequate and appropriate bund capacity.

I look forward to hearing from you on this and the roads related matters raised in my email dated 20th April, 2022.
