Subject: Sewage system

Hi all,

As a home owner in Killenard, I would like to suggest that the council address a sewage connection in Ballycarroll Portarlinton for local houses. There is a pumped system going up our road from a private estate in Ballybrittas which I know can't be used. Why can't a new system be installed by the council in conjunction with the local residents to get rid of the septic tanks in our back gardens. In some case where there is planing permission for an estate at the back of the house , can the Bulider not be made to provide a connection for those houses as part of the planning.

Kind regards,
Thomas Fallon
